

Corporate Brochure

Connect the dots with technology

Transform your business

**Dextrasys Technologies is a specialist
information research services company.**

**We provide Knowledge, Business and Technology research services
to global Business & Professional customers.**

WELCOME TO DEXTRASYS

Dextrasys Technologies Private Limited is a leading information research services provider with strong Business and Technology focus.

Greek dexios; Latin dextr, dexter; Middle French dexterite - from which words dextral, dexterity and dexterous are derived -means relating to right, skillful, adroit and deft.

True to its name, we are a team of consultants, engineers & professionals with superior technology & business skills.

Our Business Philosophy

CUSTOMERS come FIRST.

Technology is just a tool.

We enable technology and bring tangible business benefits to our customers.

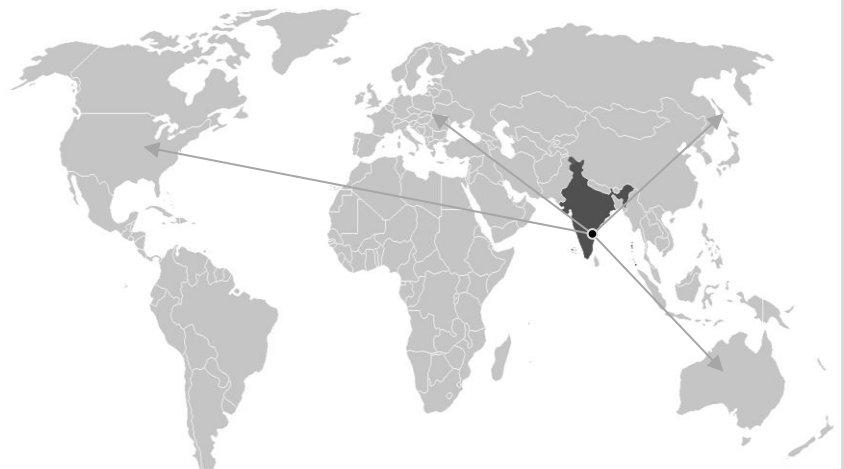

We use technology and information creatively to transform customers' business.

OUR VISION:

- » To be the best and preferred business partners for our customers.
- » Create the best place to work and learn for our employees
- » Be a socially responsive enterprise.
- » Place Dextrasys and Trichy in global business services map.

Our Objectives

- Deliver on-time with quality and cost benefits
- Consistently exceed expectations
- Support in improving productivity, quality and cost of service for customers
- Change the way companies manage Knowledge and Business Processes

We serve global customers including those from North America, Europe, Japan and Australia.

OUR EXPERTISE

Knowledge Services (KPO)

- Intellectual Property Services
- Scientific information Services
- Scientific editing services
- Engineering & Design Services
- Legal Services including Real Estate Services
- Market Research
- Supply Chain Management & Procurement Support Services
- Financial Analytics

Business Services (BPO)

- Accounting & Finance
- Human Resource Management
- Health care
- Insurance
- Real Estate
- Logistics
- Clinical research and data management

Information Technology Services (ITO)

- Software Development
- Web based business tools
- Maintenance and Support

Our services and capabilities covers entire spectrum of outsourced services

The objective of our Knowledge Services is to create value for the clients by providing domain expertise in Science, Engineering, Law & Finance.

With our knowledge & information research services, clients can improve their top line growth by outsourcing some of the core activities that require high skills.

We take up resource-consuming transaction based activities so that our clients can stay focused and stay close to their customers.

Business process outsourcing is not an option any more. The line between 'outsourcable' and 'non-outsourcable' processes is fast changing.

Our application development is focused on specific business process needs of customers. We develop state of the art web based tools.

Our successful software applications include:

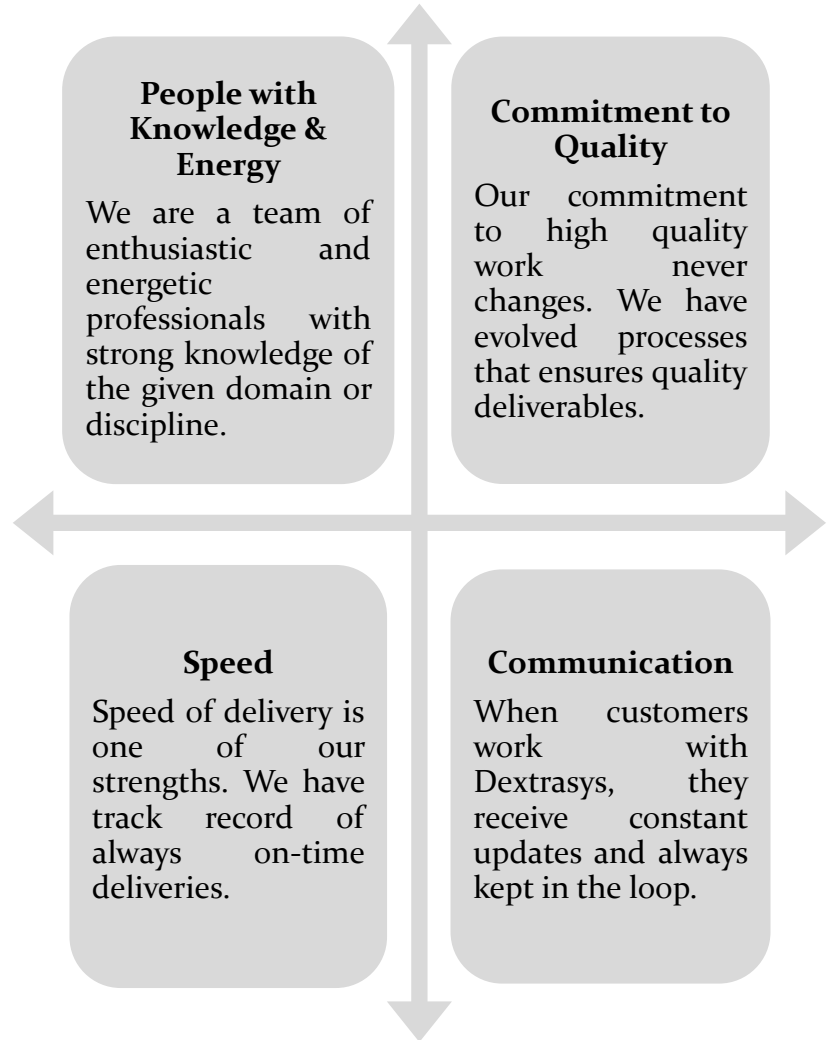

DONE! – Web based tool that helps in managing and tracking Operational and Business Enabling activities.

RESOLVE - Customizable software that supports in capturing, tracking and effectively managing issues, feedback, ideas.

DEXTRASYS DIFFERENTIATORS

It is not same when companies work with Dextrasys. At Dextrasys we stand out from the rest of the world.
